# Add Employee BRD

## Overview

This Business Requirements Document defines the **Add Employee** capability within the broader HRMS ecosystem. The HRMS may contain multiple functional modules such as Employee, Leave, Attendance, Payroll, and related employee lifecycle areas, but this document is limited strictly to the Add Employee scope under the Employee module.[file:65][web:85]

The Add Employee capability should create a complete employee master record by capturing personal information, contact details, family information, employment details, qualifications, payroll and bank data, statutory identity data, supporting documents, insurance information, previous employment, system enablement details, and asset accountability details required during onboarding and profile creation.[file:65][web:85]

It should validate mandatory information, store repeatable child records, link proofs and attachments to the correct business entity, support secure handling of sensitive information, and prepare the employee record for downstream use in modules such as leave, attendance, payroll, benefits administration, internal access management, and lifecycle processing.[file:65][web:85]

The design should be section-driven rather than a single long flat form because employee systems commonly organize information into grouped profile areas with structured records, attachments, validations, and controlled access based on role and sensitivity.[file:65][web:85]

## Module context

The HRMS is expected to contain multiple modules. Employee is one of the core modules and may contain features such as Add Employee, Employees List, My Profile or My Details, and Separation or Exit Management, while Leave may contain Apply Leave, Leave History, Leave Balance, approval actions, and policy-driven leave controls.[file:65]

This document focuses only on **Add Employee**, which is the master creation and maintenance entry point for employee profile data. It is not intended to define Leave, Attendance, Payroll run processing, or other modules except where Add Employee data feeds those modules indirectly.[file:65]

## Objective

The objective of Add Employee is to provide a complete, scalable, secure, and validation-driven employee creation framework that supports onboarding, profile maintenance, benefits enrollment, statutory readiness, payroll setup, internal access control, asset assignment, and future offboarding dependencies.[file:65][web:85]

The solution must support both immediate onboarding needs and future growth, so the architecture should allow repeatable child records, document-linked entities, configurable validations, permission-based access, and workflow readiness without requiring a redesign each time new fields or business rules are introduced.[file:65]

## Scope

### In scope

- Create a new employee master record.[file:65]
- Capture personal, contact, family, employment, education, skills, payroll, experience, insurance, documents, access, and asset-related data required at onboarding or during profile completion.[file:65]
- Support grouped sections and tab-based navigation for related data areas.[file:65]
- Support upload, linkage, and verification of supporting documents.[file:65]
- Maintain repeatable child entities such as addresses, emergency contacts, education rows, certifications, previous employers, documents, nominees, access records, and asset assignments.[file:65]
- Enable future downstream use by other modules such as payroll, leave, attendance, and exit management through a normalized employee master structure.[file:65][web:85]

### Out of scope

- Leave request processing and leave policy engine.[file:65]
- Attendance capture, shift punch integration, geo-tracking, or biometric integration.[file:65]
- Payroll calculation engine, tax computation, reimbursement engine, or final settlement calculation logic.[file:65]
- Full separation workflow execution, though Add Employee data must support future separation linkage.[file:65]
- General-purpose custom field builder and standalone change request module as separate user-facing sections.[file:65]

### Design principles

- The Add Employee experience must be section-based and easy to navigate.[file:65]
- Related concepts may appear under one parent section with separate tabs, but distinct business entities should remain logically separate in the data model.[file:65]
- Repeatable information must be stored as child collections rather than duplicated flat fields.[file:65]
- Sensitive information must be protected through masking, encryption, role-based access, and auditability.[file:65]
- Attachments should not be scattered loosely; they should be linked either to a specific business record or to a structured document category.[file:65]

- System-generated credentials and access states must be stored securely, and plain-text passwords must never be stored.[file:65][web:77][web:82]
- Asset accountability and access provisioning should be coordinated because onboarding and offboarding controls typically require alignment between issued tools, access rights, and return or revocation checkpoints.[web:77][web:82]

### Functional architecture

The Add Employee module should be built as a parent employee master with section-wise child entities. Single-instance information should stay in one-to-one sections, while repeatable or historical data should stay in one-to-many child records.[file:65]

Entity grouping:

- Employee Master
- Personal Information
- Contact Details and Emergency Contacts
- Family Details and Dependents
- Employment Details
- Education and Certifications
- Skills and Competencies
- Compensation, Payroll and Bank
- Identity, Statutory and Documents
- Previous Employment
- Insurance and Nominees
- System Access and Assets
- Separation Readiness Metadata, if required internally for future lifecycle linkage only.[file:65]

### Section architecture

The following structure defines the Add Employee screen.

1. Personal Information
2. Contact Details

- Tab A: Contact and Address
- Tab B: Emergency Contacts

3. Family Details

- Tab A: Family Members
- Tab B: Dependents

4. Employment Details

5. Education Details
- Tab A: Academic Education
- Tab B: Certifications
6. Skills and Competencies
7. Compensation, Payroll and Bank
8. Identity, Statutory and Documents
9. Previous Employment
10. Insurance and Nominees
- Tab A: Insurance
- Tab B: Nominees
11. System Access and Assets
- Tab A: System Access
- Tab B: Assets and Compliance

This structure keeps the UI compact while preserving the business meaning of each information group.[file:65]

### System Access and Assets

System Access and Assets should appear under one parent section with separate tabs because both areas represent employee enablement, operational readiness, accountability, and control after onboarding. These functions are commonly coordinated by IT, Administration, or Operations teams and are closely tied to employee lifecycle controls such as provisioning, acknowledgment, recovery, disablement, and compliance tracking.[file:65][web:77][web:82]

Even though they appear together in the UI, they must remain separate underlying entities because access records are application-centric and time-sensitive, while asset records are inventory-centric and may involve issue history, return condition, recovery amounts, ownership type, and physical handover controls.[file:65][web:77][web:82]

The section should therefore contain two tabs: **System Access** and **Assets and Compliance**, with separate child records for access rows, asset assignments, and compliance acknowledgements.[file:65]

### Section-wise business requirements

### 1. Personal Information

## Purpose

This section captures the employee's core identity and basic biographical details. It should hold profile information that defines the person but does not belong in payroll, statutory, or relationship-based sections.[file:65]

## Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Salutation | Dropdown | No | No | Configurable values such as Mr, Ms, Mrs, Dr, Mx, or Other.[file:65] |
| First Name | Text | Yes | No | Legal or primary first name of the employee.[file:65] |
| Middle Name | Text | No | No | Optional middle name.[file:65] |
| Last Name | Text | Yes | No | Legal or primary surname.[file:65] |
| Preferred Name | Text | No | No | Optional display name for profile or internal communication.[file:65] |
| Gender | Dropdown | Yes | No | Configurable gender values as per policy.[file:65] |
| Date of Birth | Date | Yes | No | Must be a past date and follow minimum-age policy rules.[file:65] |
| Marital Status | Dropdown | No | No | Optional for policy or benefits purposes.[file:65] |
| Blood Group | Dropdown | No | No | Optional but useful for medical emergency records.[file:65] |
| Nationality | Dropdown or Text | No | No | Optional or mandatory based on region and hiring policy.[file:65] |
| Place of Birth | Text | No | No | Optional demographic detail.[file:65] |
| Religion | Dropdown or Text | No | No | Optional and policy-controlled.[file:65] |
| Category or Community | Dropdown or Text | No | No | Region-specific and policy-controlled.[file:65] |
| Employee Photo | Image Upload | No | No | Profile image with file type and size checks.[file:65] |

## Notes

This section is a single-record section per employee. The employee photo may also exist in the document repository, but one profile photo should be marked as the active display image.[file:65]

## 2. Contact Details

This is a parent section with two tabs: Contact and Address, and Emergency Contacts.[file:65]

## Tab A: Contact and Address

## Purpose

This tab stores the employee's communication channels and address records. It should support multiple address types and proof-backed updates where needed.[file:65]

## Contact fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Personal Email | Email | Yes | No | Primary personal email with format validation and optional uniqueness rule.[file:65] |
| Alternate Personal Email | Email | No | No | Secondary personal email, if provided.[file:65] |
| Mobile Number | Phone | Yes | No | Primary mobile number with country code support.[file:65] |
| Alternate Mobile Number | Phone | No | No | Secondary mobile number.[file:65] |
| Landline Number | Phone | No | No | Optional contact line.[file:65] |
| LinkedIn Profile URL | URL | No | No | Optional professional profile link.[file:65] |
| Official Email | Email | No | No | Assigned after joining or post-approval depending on process.[file:65] |

## Address sub-entity

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Address Type | Dropdown | Yes | Yes | Current, Permanent, Temporary, Native, or Other.[file:65] |
| House or Flat No. | Text | No | Yes | Address line component.[file:65] |
| Street or Street No. | Text | No | Yes | Street information.[file:65] |
| Landmark | Text | No | Yes | Optional reference point.[file:65] |
| Colony or Locality | Text | No | Yes | Local area descriptor.[file:65] |
| Area | Text | No | Yes | Administrative or locality area.[file:65] |
| City | Text | Yes | Yes | City or town value.[file:65] |
| District | Text | No | Yes | Optional district value.[file:65] |

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| State or Province | Dropdown or Text | Yes | Yes | State-level location detail.[file:65] |
| Country | Dropdown | Yes | Yes | Country value.[file:65] |
| Pincode or Postal Code | Text | Yes | Yes | Country-sensitive validation should be supported.[file:65] |
| Same as Another Address | Checkbox | No | Yes | Copy helper only; the system should still persist a separate address row.[file:65] |
| Effective From | Date | No | Yes | Optional for history tracking.[file:65] |
| Effective To | Date | No | Yes | Optional for history tracking.[file:65] |
| Address Proof Link | Lookup | No | Yes | Link to a document in the merged document repository.[file:65] |

## Tab B: Emergency Contacts

### Purpose

This tab records people who should be contacted in urgent situations. Emergency contacts must stay distinct from family members, dependents, insured members, and nominees because the relationship model and business purpose are different.[file:65]

### Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Contact Name | Text | Yes | Yes | Repeatable emergency contact entry.[file:65] |
| Relationship | Dropdown or Text | Yes | Yes | Relationship such as Father, Mother, Spouse, Friend, Sibling, or Other.[file:65] |
| Primary Contact Number | Phone | Yes | Yes | Main emergency contact number.[file:65] |
| Alternate Contact Number | Phone | No | Yes | Optional alternate number.[file:65] |
| Email | Email | No | Yes | Optional email address.[file:65] |
| Address | Text Area or Address Reference | No | Yes | Optional address detail.[file:65] |
| Priority Order | Number | No | Yes | Optional order in case multiple contacts exist.[file:65] |
| Primary Emergency Contact Flag | Checkbox | No | Yes | Only one emergency contact should be marked primary.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

## 3. Family Details

This is a parent section with two tabs: Family Members and Dependents.[file:65]

## Tab A: Family Members

### Purpose

This tab stores relationship-based family information. A family member may later be referenced from insurance, emergency contact, or nominee records, but the family record should remain a distinct person-linked entity.[file:65]

### Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Family Member Name | Text | Yes | Yes | Name of the related family member.[file:65] |
| Relationship | Dropdown | Yes | Yes | Relationship such as Spouse, Son, Daughter, Father, Mother, Brother, Sister, or Other.[file:65] |
| Gender | Dropdown | No | Yes | Optional demographic field.[file:65] |
| Date of Birth | Date | No | Yes | Optional date of birth.[file:65] |
| Marital Status | Dropdown | No | Yes | Optional status.[file:65] |
| Occupation | Text | No | Yes | Optional occupation field.[file:65] |
| Contact Number | Phone | No | Yes | Optional phone number.[file:65] |
| Email | Email | No | Yes | Optional email address.[file:65] |
| Lives with Employee | Checkbox | No | Yes | Optional informational flag.[file:65] |
| Address Same as Employee | Checkbox | No | Yes | Optional helper for reference only.[file:65] |
| Notes | Text Area | No | Yes | Optional notes.[file:65] |

## Tab B: Dependents

### Purpose

This tab stores financially dependent persons for benefits, declarations, reimbursements, or policy-based eligibility rules. A dependent may be linked to an existing family member but should remain a separate business object because dependency is financial or benefit-based, not purely relationship-based.[file:65]

## Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Dependent Name | Text | Yes | Yes | Repeatable dependent record.[file:65] |
| Relationship | Dropdown | Yes | Yes | Relationship to employee.[file:65] |
| Linked Family Record | Lookup | No | Yes | Preferred when the dependent already exists in Family Members.[file:65] |
| Date of Birth | Date | Yes | Yes | Supports age and policy checks.[file:65] |
| Gender | Dropdown | No | Yes | Optional demographic field.[file:65] |
| Financially Dependent | Checkbox | Yes | Yes | Core business flag for this tab.[file:65] |
| Monthly Income or Pension | Number | No | Yes | Optional, for policy thresholds.[file:65] |
| Student Status | Checkbox | No | Yes | Optional policy qualifier.[file:65] |
| Disability Status | Checkbox | No | Yes | Optional policy qualifier.[file:65] |
| Dependency Start Date | Date | No | Yes | Optional.[file:65] |
| Dependency End Date | Date | No | Yes | Optional.[file:65] |
| Eligible for Benefits | Checkbox | No | Yes | Optional derived or maintained flag.[file:65] |
| Proof Document Link | Lookup | No | Yes | Declaration, birth proof, or other evidence.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

# 4. Employment Details

## Purpose

This section stores the employee's organizational assignment and employment relationship with the company. It feeds several downstream modules such as attendance, leave approval routing, reporting hierarchy, and payroll readiness.[file:65]

## Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Employee ID | Text or Auto Number | Yes | No | Unique employee code.[file:65] |
| Official Email | Email | No | No | Unique work email once provisioned.[file:65] |
| Date of Joining | Date | Yes | No | Official hire or joining date.[file:65] |
| Employment Status | Dropdown | Yes | No | Draft, Active, Probation, Notice Period, Separated, or Inactive.[file:65] |

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Employment Type | Dropdown | Yes | No | Full-time, Part-time, Contract, Intern, Consultant, or similar.[file:65] |
| Department | Dropdown | Yes | No | Department master-based value.[file:65] |
| Business Unit | Dropdown | No | No | Optional organizational classification.[file:65] |
| Designation | Dropdown or Text | Yes | No | Employee role title.[file:65] |
| Grade or Pay Level | Dropdown or Text | No | No | Organizational or payroll grade.[file:65] |
| Work Location | Dropdown or Text | Yes | No | Office, branch, remote, hybrid, or specific location.[file:65] |
| Reporting Manager | Employee Lookup | No | No | Primary reporting manager.[file:65] |
| Dotted Line Manager | Employee Lookup | No | No | Optional matrix manager.[file:65] |
| Shift Timing | Dropdown or Time Range | No | No | Optional shift definition.[file:65] |
| Work Schedule | Dropdown | No | No | Optional calendar or roster reference.[file:65] |
| Probation Start Date | Date | No | No | Optional probation tracking field.[file:65] |
| Probation End Date | Date | No | No | Optional probation tracking field.[file:65] |
| Confirmation Date | Date | No | No | Optional post-probation milestone.[file:65] |
| Cost Center | Dropdown or Text | No | No | Optional finance linkage.[file:65] |
| Employee Category | Dropdown | No | No | Staff, Worker, Management, etc.[file:65] |
| HR Owner or HRBP | Employee Lookup | No | No | Optional HR ownership field.[file:65] |

## 5. Education Details

This is a parent section with two tabs: Academic Education and Certifications.[file:65]

### Tab A: Academic Education

### Purpose

This tab stores the employee's academic history in repeatable rows. It should support multiple qualifications and allow one row to be marked as the highest qualification.[file:65]

## Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Qualification Level | Dropdown | Yes | Yes | 10th, 12th, Diploma, UG, PG, Doctorate, or Other.[file:65] |
| Degree or Course Name | Text | Yes | Yes | Main qualification name.[file:65] |
| Specialization or Major | Text | No | Yes | Optional specialization.[file:65] |
| Institution or College Name | Text | Yes | Yes | Education institution name.[file:65] |
| University or Board Name | Text | No | Yes | Awarding body or board.[file:65] |
| Mode of Study | Dropdown | No | Yes | Full-time, Part-time, Distance, etc.[file:65] |
| Start Date | Date | No | Yes | Optional academic start date.[file:65] |
| End Date | Date | No | Yes | Optional academic end date.[file:65] |
| Year of Passing | Year or Number | No | Yes | Four-digit year.[file:65] |
| Grade, Percentage or CGPA | Text or Number | No | Yes | Flexible format based on institute style.[file:65] |
| Highest Qualification Flag | Checkbox | No | Yes | Only one row should be flagged highest.[file:65] |
| Education Document Link | Lookup | No | Yes | Link to marksheet, degree, or transcript in the merged document repository.[file:65] |

## Tab B: Certifications

## Purpose

This tab stores non-academic professional, domain, or technical certifications, including validity where applicable.[file:65]

## Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Certification Name | Text | Yes | Yes | Name of certification.[file:65] |
| Issuing Organization | Text | No | Yes | Certification authority or organization.[file:65] |
| Credential ID | Text | No | Yes | Optional credential identifier.[file:65] |
| Issue Date | Date | No | Yes | Date issued.[file:65] |
| Valid From | Date | No | Yes | Optional validity start date.[file:65] |

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Valid To | Date | No | Yes | Optional validity end date.[file:65] |
| Certification Score or Grade | Text | No | Yes | Optional result or grade.[file:65] |
| Verification URL | URL | No | Yes | Optional verification link.[file:65] |
| Attachment Link | Lookup | No | Yes | Link to certificate upload.[file:65] |
| Active or Expired Status | Derived or Dropdown | No | Yes | Derived from dates or maintained per policy.[file:65] |

## 6. Skills and Competencies

### Purpose

This section stores skill inventory data for staffing, internal search, analytics, talent mapping, and future role matching.[file:65]

### Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Skill Name | Text or Lookup | Yes | Yes | Prefer a skill master for consistency.[file:65] |
| Skill Category | Dropdown | No | Yes | Technical, Functional, Behavioral, Language, Tool, etc.[file:65] |
| Proficiency Level | Dropdown | No | Yes | Beginner, Intermediate, Advanced, Expert.[file:65] |
| Years of Experience | Number | No | Yes | Non-negative value.[file:65] |
| Last Used Year | Year | No | Yes | Optional recency indicator.[file:65] |
| Linked Certification | Lookup | No | Yes | Optional link to a certification row.[file:65] |
| Primary Skill Flag | Checkbox | No | Yes | Optional flag for major skills.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

## 7. Compensation, Payroll and Bank

### Purpose

This section stores payroll-driving references and salary disbursement bank data. It should support operational payroll readiness without turning Add Employee into the payroll engine itself.[file:65]

### Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Payroll Group | Dropdown | No | No | Optional payroll grouping.[file:65] |
| Salary Structure Plan | Dropdown | No | No | Salary structure or plan reference.[file:65] |
| Pay Grade or Level | Dropdown or Text | No | No | Payroll-owned grade if applicable.[file:65] |
| Bank Name | Text or Lookup | Yes | No | Employee bank name.[file:65] |
| Account Holder Name | Text | No | No | Name on bank account.[file:65] |
| Bank Account Number | Text | Yes | No | Sensitive data; must be masked in the UI.[file:65] |
| Re-enter Account Number | Text | No | No | Validation-only field; should not be stored as business data.[file:65] |
| Branch Name | Text | No | No | Bank branch detail.[file:65] |
| IFSC Code | Text | Yes | No | Format-based validation required.[file:65] |
| MICR Number | Text | No | No | Optional bank routing detail.[file:65] |
| Account Type | Dropdown | No | No | Savings, Current, Salary, or Other.[file:65] |
| Bank Address | Text Area | No | No | Optional branch address.[file:65] |
| Salary Payment Mode | Dropdown | No | No | Bank transfer, cheque, or policy-driven alternatives.[file:65] |
| Tax Regime | Dropdown | No | No | Country-specific payroll option.[file:65] |
| Payroll Effective From | Date | No | No | Optional payroll start date.[file:65] |
| Bank Proof Link | Lookup | No | No | Link to bank proof or cancelled cheque in document repository.[file:65] |

## 8. Identity, Statutory and Documents

### Purpose

This section combines structured identity and statutory data with document repository functions in one parent section. This is the recommended design because identity details and supporting proofs are operationally connected during onboarding and verification, but the system should still preserve structured sub-entities under the section.[file:65][web:80][web:85]

This section should have two internal logical layers even if shown inside one section:

- Structured identity and statutory records.[file:65]
- Document repository and linked proofs.[file:65]

## Fixed identity and statutory fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| PAN Number | Text | No | No | Format validation required; should be masked.[file:65] |
| Aadhaar Number | Text | No | No | Format validation, masked display, and encrypted storage required.[file:65] |
| UAN | Text | No | No | Optional based on employee type and policy.[file:65] |
| PF Account Number | Text | No | No | Optional as applicable.[file:65] |
| ESI Number | Text | No | No | Optional as applicable.[file:65] |

## Generic identification document rows

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Document Type | Dropdown | Yes | Yes | PAN, Aadhaar, Passport, Voter ID, Driving License, Visa, Other.[file:65] |
| Document Number | Text | Yes | Yes | Document reference number.[file:65] |
| Name on Document | Text | No | Yes | Optional legal name on the document.[file:65] |
| Issuing Authority | Text | No | Yes | Optional issuing authority.[file:65] |
| Issue Date | Date | No | Yes | Optional issue date.[file:65] |
| Valid From | Date | No | Yes | Optional validity start date.[file:65] |
| Valid To | Date | No | Yes | Optional validity end date.[file:65] |
| Country of Issue | Dropdown | No | Yes | Optional country of issue.[file:65] |
| Place of Issue | Text | No | Yes | Optional place of issue.[file:65] |
| Verification Status | Dropdown | No | Yes | Pending, Verified, Rejected, Expired, etc.[file:65] |
| Verified By | Employee Lookup | No | Yes | Optional verifier reference.[file:65] |
| Front Attachment Link | Lookup | No | Yes | Document image or proof front side.[file:65] |
| Back Attachment Link | Lookup | No | Yes | Back side proof if required.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

### Generic document repository model

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Document Category | Dropdown | Yes | Yes | Identity, Address, Education, Experience, Payroll, Insurance, Offer, Other.[file:65] |
| Document Name | Text | Yes | Yes | User-friendly document label.[file:65] |
| Related Section | Dropdown | No | Yes | Parent section linkage.[file:65] |
| Related Record ID | Text or Lookup | No | Yes | Child row reference for document linkage.[file:65] |
| File Upload | File Upload | Yes | Yes | Size, format, and scan validations required.[file:65] |
| Upload Date | System Date | No | Yes | System-managed upload timestamp.[file:65] |
| Valid From | Date | No | Yes | Optional.[file:65] |
| Valid To | Date | No | Yes | Optional.[file:65] |
| Verification Status | Dropdown | No | Yes | Pending, Verified, Rejected, Expired, etc.[file:65] |
| Verified By | Employee Lookup | No | Yes | Optional verifier.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

### Expected document coverage

The repository should be able to store and link identity proofs, address proofs, education documents, certifications, payslips, bank statements, experience letters, relieving letters, current organization offer letters, employee photos, insurance proofs, and nominee-related proofs.[file:65]

## 9. Previous Employment

### Purpose

This section stores prior employment history in repeatable rows so that the organization can capture experience continuity, prior PF or statutory references, document evidence, and background information.[file:65]

### Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Employer Name | Text | Yes | Yes | Previous employer or organization name.[file:65] |
| Employer Location | Text | No | Yes | Work location or employer location.[file:65] |

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Designation | Text | No | Yes | Previous designation.[file:65] |
| Employment Type | Dropdown | No | Yes | Full-time, Contract, Consultant, etc. [file:65] |
| Start Date | Date | Yes | Yes | Employment start date.[file:65] |
| End Date | Date | No | Yes | Employment end date.[file:65] |
| Total Experience in Employer | Number or Text | No | Yes | Optional or derived duration.[file:65] |
| Previous Employer PF Account Number | Text | No | Yes | Optional statutory linkage.[file:65] |
| Manager Name | Text | No | Yes | Optional reporting manager name. [file:65] |
| Last Drawn Salary | Number | No | Yes | Sensitive data; role-based access recommended.[file:65] |
| Reason for Leaving | Text Area | No | Yes | Optional exit reason.[file:65] |
| Skills Used | Text or Lookup | No | Yes | Optional experience mapping.[file:65] |
| Experience Letter Link | Lookup | No | Yes | Link to experience letter document. [file:65] |
| Relieving Letter Link | Lookup | No | Yes | Link to relieving letter.[file:65] |
| Payslip Link | Lookup | No | Yes | Link to salary proof.[file:65] |

## 10. Insurance and Nominees

This is a parent section with two tabs: Insurance and Nominees.[file:65]

## Tab A: Insurance

## Purpose

This tab stores policy or benefit enrollment records and covered-member details where employee-linked benefits apply.[file:65]

## Insurance policy fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Benefit Type | Dropdown | Yes | Yes | Health Insurance, Life Insurance, Accident Insurance, Mediclaim, or Other.[file:65] |
| Provider Name | Text or Lookup | No | Yes | Insurer or provider name.[file:65] |
| Policy Number | Text | No | Yes | Policy or membership number.[file:65] |

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Coverage Start Date | Date | No | Yes | Coverage commencement date.[file:65] |
| Coverage End Date | Date | No | Yes | Coverage expiry date.[file:65] |
| Employee Covered Flag | Checkbox | No | Yes | Usually true but should still be explicit.[file:65] |
| Premium Sharing Type | Dropdown | No | Yes | Employer-paid, Employee-paid, or Shared.[file:65] |
| Coverage Amount | Number | No | Yes | Optional insured amount.[file:65] |
| Policy Status | Dropdown | No | Yes | Active, Pending, Expired, Cancelled, etc.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

### Covered member sub-entity

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Member Name | Text or Family/Dependent Lookup | Yes | Yes | Prefer a linked person where possible.[file:65] |
| Relationship | Dropdown | Yes | Yes | Relationship to employee.[file:65] |
| Linked Family or Dependent Record | Lookup | No | Yes | Optional but preferred linkage.[file:65] |
| Covered Under Policy | Checkbox | Yes | Yes | Coverage indicator.[file:65] |
| Sum Insured Allocation | Number | No | Yes | Optional allocation value.[file:65] |
| Coverage Effective From | Date | No | Yes | Optional effective start.[file:65] |
| Coverage Effective To | Date | No | Yes | Optional effective end.[file:65] |
| Insurance Card Proof Link | Lookup | No | Yes | Optional insurance proof attachment.[file:65] |

## Tab B: Nominees

### Purpose

This tab stores benefit claim or payout nominees. Nominee records must stay benefit-wise because the same person may be eligible for one benefit but not another, and the share percentage may differ by benefit type.[file:65]

## Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Benefit Type | Dropdown | Yes | Yes | PF, Gratuity, Insurance, Final Settlement, or Other.[file:65] |
| Nominee Name | Text | Yes | Yes | Repeatable nominee row.[file:65] |
| Relationship | Dropdown | Yes | Yes | Relationship to employee.[file:65] |
| Linked Family or Dependent Record | Lookup | No | Yes | Optional but preferred linkage.[file:65] |
| Date of Birth | Date | No | Yes | Important for minor handling rules.[file:65] |
| Contact Number | Phone | No | Yes | Optional contact number.[file:65] |
| Address | Text Area | No | Yes | Optional address detail.[file:65] |
| Minor Flag | Checkbox | No | Yes | Indicates nominee is a minor.[file:65] |
| Guardian Name | Text | No | Yes | Required when nominee is a minor, based on policy.[file:65] |
| Share Percentage | Number | Yes | Yes | Total should equal 100 per benefit type where applicable.[file:65] |
| Priority Order | Number | No | Yes | Optional ordering field.[file:65] |
| Active Flag | Checkbox | No | Yes | Indicates active nominee row.[file:65] |
| Effective From | Date | No | Yes | Optional effective start.[file:65] |
| Effective To | Date | No | Yes | Optional effective end.[file:65] |
| Bank Name | Text | No | Yes | Optional nominee bank detail.[file:65] |
| Account Number | Text | No | Yes | Sensitive and masked field.[file:65] |
| IFSC Code | Text | No | Yes | Optional bank routing field.[file:65] |
| Aadhaar Number | Text | No | Yes | Optional and policy-based.[file:65] |
| PAN Number | Text | No | Yes | Optional and policy-based.[file:65] |
| Proof Document Link | Lookup | No | Yes | ID or bank proof document.[file:65] |

## 11. System Access and Assets

This is a parent section with two tabs: System Access and Assets and Compliance.[file:65] [web:77][web:82]

## Tab A: System Access

### Purpose

This tab manages internal tool and application access provisioning for the employee. It should support request, activation, end dating, reset requirement, and basic control status without storing any plain-text password values.[file:65][web:77][web:82]

### Fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Application or System Name | Dropdown or Text | Yes | Yes | Repeatable for multiple systems.[file:65] |
| Username or Login ID | Text | Yes | Yes | Unique per system where applicable.[file:65] |
| Role or Access Profile | Dropdown | No | Yes | Application-specific role or privilege profile.[file:65] |
| Access Start Date | Date | No | Yes | Optional access activation date.[file:65] |
| Access End Date | Date | No | Yes | Optional end date for temporary or contract access.[file:65] |
| Account Status | Dropdown | No | Yes | Requested, Active, Locked, Disabled, etc.[file:65] |
| Password Setup Required | Checkbox | No | Yes | Indicates setup pending.[file:65] |
| Temporary Password Issued Flag | Checkbox | No | Yes | Store flag only, never the actual password.[file:65] |
| Password Reset Required | Checkbox | No | Yes | Indicates mandatory reset on first login or after admin action.[file:65] |
| MFA Enabled | Checkbox | No | Yes | Optional security flag.[file:65] |
| Last Login | DateTime | No | Yes | System-driven field, if available.[file:65] |
| Access Approval Reference | Text | No | Yes | Optional approval or ticket reference.[file:65] |

## Tab B: Assets and Compliance

### Purpose

This tab tracks physical or controlled assets issued to the employee and related compliance acknowledgements. Asset return, inventory accuracy, and access-linked accountability are widely recognized as critical employee lifecycle controls, especially during separation and offboarding.[file:65][web:77][web:82]

## Asset assignment fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Asset Assignment ID | Auto Number | Yes | Yes | Unique assignment record identifier.[file:65] |
| Asset Type | Dropdown | Yes | Yes | Laptop, Desktop, Monitor, Phone, SIM, ID Card, Access Card, Key, Vehicle, Uniform, Headset, Other.[file:65] |
| Asset Category | Dropdown | No | Yes | IT, Admin, Security, Facilities, Operations, etc. [file:65] |
| Asset Name or Description | Text | Yes | Yes | Human-readable asset label.[file:65] |
| Asset ID or Serial Number | Text | No | Yes | Unique where applicable.[file:65] |
| Make or Brand | Text | No | Yes | Optional make field.[file:65] |
| Model | Text | No | Yes | Optional model field.[file:65] |
| Configuration Details | Text Area | No | Yes | RAM, storage, IMEI, or similar details.[file:65] |
| Tag Number or Barcode | Text | No | Yes | Optional inventory reference.[file:65] |
| Ownership Type | Dropdown | No | Yes | Company-owned, leased, vendor-owned, or employee-owned.[file:65] |
| Issued Date | Date | Yes | Yes | Date of issue.[file:65] |
| Issued By | Employee Lookup or Text | No | Yes | Issuing authority or person.[file:65] |
| Issue Location | Text | No | Yes | Optional location of assignment.[file:65] |
| Employee Acknowledgement Flag | Checkbox | No | Yes | Acknowledgement capture indicator.[file:65] |
| Acknowledgement Date | Date | No | Yes | Optional acknowledgement date.[file:65] |
| Asset Condition at Issue | Dropdown | No | Yes | New, Good, Used, Damaged.[file:65] |
| Warranty Start Date | Date | No | Yes | Optional.[file:65] |
| Warranty End Date | Date | No | Yes | Optional.[file:65] |
| Insurance Covered Flag | Checkbox | No | Yes | Indicates insured asset.[file:65] |
| Asset Value | Number | No | Yes | Optional valuation.[file:65] |
| Security Deposit Applicable | Checkbox | No | Yes | Optional flag.[file:65] |
| Deposit Amount | Number | No | Yes | Optional deposit amount.[file:65] |
| Remarks | Text Area | No | Yes | Optional notes.[file:65] |

## Asset return and recovery fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Return Required Flag | Checkbox | No | Yes | Indicates whether return is expected.[file:65] |
| Expected Return Date | Date | No | Yes | Can later align with exit date.[file:65] |
| Actual Return Date | Date | No | Yes | Actual handover date.[file:65] |
| Returned To | Employee Lookup or Text | No | Yes | Receiver of returned asset.[file:65] |
| Return Condition | Dropdown | No | Yes | Good, Damaged, Missing Accessories, Lost, Not Returned.[file:65] |
| Missing Items Detail | Text Area | No | Yes | Optional details for missing components.[file:65] |
| Damage Notes | Text Area | No | Yes | Optional damage description.[file:65] |
| Recovery Required Flag | Checkbox | No | Yes | Indicates recovery or deduction need.[file:65] |
| Recovery Amount | Number | No | Yes | Optional recovery value.[file:65] |
| Recovery Approved By | Employee Lookup | No | Yes | Approval reference for recovery decision.[file:65] |
| Recovery Status | Dropdown | No | Yes | Pending, Deducted, Waived, Recovered.[file:65] |
| Asset Closure Status | Dropdown | No | Yes | Open, Returned, Lost, Written Off, Transferred.[file:65] |
| Return Proof Link | Lookup | No | Yes | Optional evidence of return.[file:65] |

## Compliance acknowledgement fields

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Policy Name | Dropdown or Text | No | Yes | NDA, IT Policy, Information Security, Code of Conduct, etc.[file:65] |
| Policy Version | Text | No | Yes | Optional version reference.[file:65] |
| Acknowledged Flag | Checkbox | No | Yes | Indicates employee acknowledgement.[file:65] |
| Acknowledged On | Date | No | Yes | Acknowledgement date.[file:65] |
| Acknowledgement Proof Link | Lookup | No | Yes | Optional proof or signed copy.[file:65] |
| Compliance Training Name | Text | No | Yes | Optional compliance learning item.[file:65] |
| Compliance Status | Dropdown | No | Yes | Pending, Completed, Expired.[file:65] |

| Field Name | Control Type | Mandatory | Repeatable | Explanation |
|---|---|---|---|---|
| Completion Date | Date | No | Yes | Optional completion date.[file:65] |
| Expiry Date | Date | No | Yes | Optional expiry date.[file:65] |

## Business rules

- Date of Birth must be earlier than Date of Joining.[file:65]
- End dates must be later than or equal to start dates across education, certifications, previous employment, insurance, access, and asset lifecycle records.[file:65]
- Only one highest qualification should be marked in academic education.[file:65]
- Only one primary emergency contact should exist for an employee.[file:65]
- Address copy options should duplicate data into a separate row, not merely display inherited values.[file:65]
- Nominee share percentage should total 100 for each benefit type where shared allocation applies.[file:65]
- Sensitive fields such as Aadhaar, PAN, bank account numbers, and nominee account numbers should be masked in the UI and encrypted at rest.[file:65]
- Plain-text passwords must never be stored in the system.[file:65][web:77][web:82]
- Employee ID and official email should be unique where applicable.[file:65]
- Asset records should remain open until returned, transferred, written off, or otherwise closed.[file:65][web:77][web:82]
- Access and asset records should support future offboarding or separation checks even if separation is outside this BRD's functional scope.[file:65][web:77][web:82]

## Role-based access guidance

- HR Admin should have broad access to employee master creation and maintenance. [file:65]
- Payroll users should have access to payroll, bank, and payroll-sensitive fields.[file:65]
- Benefits administrators should have access to family, dependents, insurance, and nominees.[file:65]
- IT or Security administrators should manage system access and IT-governed assets.[file:65] [web:77][web:82]
- Admin or Facilities teams may manage non-IT physical assets such as cards, keys, uniforms, or parking access.[file:65]
- Employee self-service, where enabled, should be restricted to permitted fields and controlled updates.[file:65][web:85]

## Data model recommendation

### Parent entity

- Employee Master.[file:65]

### One-to-one child entities

- Personal Information.[file:65]
- Employment Details.[file:65]
- Compensation, Payroll and Bank snapshot.[file:65]

### One-to-many child entities

- Addresses.[file:65]
- Emergency Contacts.[file:65]
- Family Members.[file:65]
- Dependents.[file:65]
- Academic Education Records.[file:65]
- Certification Records.[file:65]
- Skills.[file:65]
- Previous Employment Records.[file:65]
- Identity Documents.[file:65]
- General Documents.[file:65]
- Insurance Policies.[file:65]
- Insurance Covered Members.[file:65]
- Nominees.[file:65]
- System Access Records.[file:65]
- Asset Assignments.[file:65]
- Compliance Acknowledgements.[file:65]

### Non-functional requirements

- The form should support draft save and staged completion for long onboarding processes.[file:65][web:85]
- Sensitive fields must support masking, encryption, and controlled visibility.[file:65]
- Attachments should support file type validation, size rules, and scanning controls.[file:65]
- The UI should support tab-based navigation, validation summaries, and clean section transitions for long forms.[file:65]

- Audit fields such as created by, created on, updated by, and updated on should exist across all entities.[file:65]
- The solution should support extensibility without redesigning the entire employee master each time a new policy field or supporting record is introduced.[file:65]

## Conclusion

The Add Employee module should be implemented as a section-driven, validation-heavy, permission-aware employee master capability that captures all onboarding-critical employee information while staying structured enough to support downstream modules such as Leave, Attendance, Payroll, Benefits, Access Management, and future Separation processing.[file:65] [web:85]

The recommended architecture is to merge **Identity and Statutory Details** with **Employee Documents** into a single parent section called **Identity, Statutory and Documents**, and to merge **System Access** with **Assets** under one parent section called **System Access and Assets** with separate tabs. This approach keeps the UI compact and logical while preserving the correct underlying data model for long-term scale, security, and lifecycle control.[file:65][web:77] [web:82]
